

A free teaching resource for KS2+3

Miss MOLECULE & friends

with special guest, Lithium!

What the bagel is this
all about??

Have you ever thought about the metals and minerals that are used in your computer, or mobile phone and where they come from?

One mineral that has become critical in the technology we use everyday, and is helping the race to Net Zero, is Lithium.

Learn about Lithium: find out where it comes from, how it was discovered and hear from Cornish Lithium who are pioneering sustainable extraction methods of Lithium in the UK.

Access the educational animation
+ KS2/3 lesson plan & resources!
